

The Children's Portal is here...

To make your referrals to SPoA, sign up today!

If you make referrals to the Single Point of Advice (SPoA) you need to register with the Children's Portal. It's a quick and easy online system for making referrals for child protection, family support and CAMHS.

Available to all professionals across the county, the web-based system means:

- the service can be accessed on any device
- a record of referrals can be kept in one place; and
- the referrer will automatically be updated on progress.

With pressures increasing on all services, The Children's Portal enables us to triage and manage referrals more efficiently, saving time and precious resources.

Please take a look and register as soon as you can. And, if you need help, take a look at this short video.

Thank you for helping improve the service!
